

wood trees

@Great Marlow School

Great Marlow School's Year 8 team are delighted to hear that a member of our local community has chosen us to support in his fantastic project to plant 1,000,000 trees in the local area.

The Aim...

To give every child in every school locally the chance to play their part in creating our own wood.

Message from the founder...

"Inspired by David Attenborough's film '*a life on Our planet*' I decided I wanted to do something to help in the fight against climate change and to help create a better future for everyone"

"My plan was to plant a Million new trees and in time to create our very own local Woodland."

"On Christmas Eve last year we started small and delivered 69 trees to friends and neighbours in our village but I had a bigger plan."

Your child could be part of the first steps in this huge community project by;

- 1) Choosing their tree
- 2) Potting their own FREE tree in a Coir pot produced by a women's co-op in Sri Lanka. (The pots are 24cm diameter)
- 3) Nurturing their potted tree at home in their garden/patio area/balcony. (Can grow up to 1.5m tall)
- 4) Planting their tree in the wood location (tbc) in Autumn 2022

To take part...

- ✓ Keep an eye out for further communication

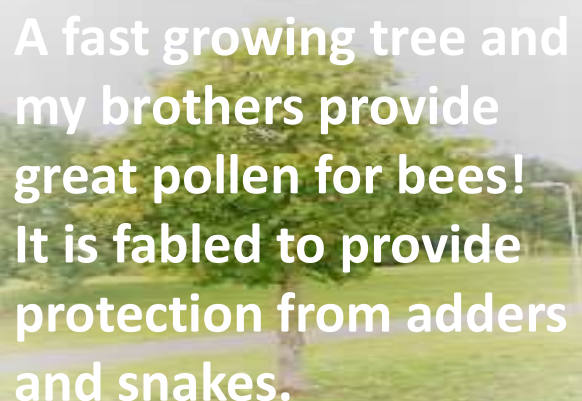

Meet the trees...

Beech *Fagus sylvatica*

A majestic tree that grows to 35-40m tall with a huge canopy from my single straight trunk. Its grey bark and extensive root system inspired the Weeping Willow of the Harry Potter movies.

Hazel *Corylus avellana*

A fast growing tree and my brothers provide great pollen for bees! It is fabled to provide protection from adders and snakes.
