7th May 2024

Dear Parent/Carer

To collect data for a year 12 PAG (required practical) I would like to take the class for a short walk up to a field at the top of Ridgeway in Marlow. We will then spend 1 - 2 hours collecting data on the plant biodiversity of the field to compare with the data they will have previously collected from the Great Marlow school playing field.

I would meet the class outside the science block at the **start of Period 1 Tuesday 21st May** where we will carry quadrats, cones and clipboards to the site. The students will not miss any lesson time. We will return before the start of Period 3.

Please can you ensure that the school records are up to date regarding any medical requirements and an emergency contact list. Students should also ensure they are wearing appropriate footwear and clothes for the weather and bring any asthma inhalers, antihistamines (hayfever!) and EpiPens they may need.

If a student cannot attend for any reason please let me know but be assured this trip is not essential. As long as they have collected the data from the school site the previous lesson and can be given the data from the Ridgeway field then the PAG can be passed without issue.

Yours faithfully

Ruth Huddleston
Science Department
